THYMOX™ TECHNOLOGY

Made with Thymol.
What does this mean?

- Thymol is the main component of Thyme essential oil
- Thymol is a natural antiseptic & antimicrobial
- Thymol is a powerful antioxidant
- Thymol allows you to wash your hands responsibly without polluting our waterways
- Thymol rapidly biodegrades
- Thymol is uniquely aromatic

Cleanses	Removes microorganisms to prevent cross-contamination between patients and health care personnel. Effective against a broad range of gram positive and gram negative bacteria, including Staph and Pseudomonas aeruginosa.
	Lathers quickly, lifting and suspending transient bacteria. Rinses freely, eliminating a possible source of irritation.
Protects	Kills germs without the harsh chemicals. No triclosan, no quats, no dyes.
	Reduces the growth of pathogenic bacteria before glove use as gloves act as an occlusive incubator for bacteria. Compatible with all glove types.
Moisturizes	Enriched with Chamomile extract to soothe and moisturize after repeated handwashing. Its mild formula helps prevent the development of dry cracked skin.
