Pixie Pearls™

Calcium Carbonate Prophy Powder

Alcohol FREE | Dye FREE | Gluten FREE

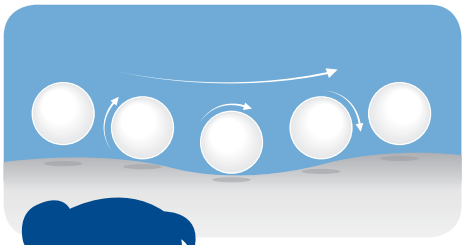

Smooth, soft, round and gentle to the tooth

- Safely and easily removes discolouration, plaque and biofilm
- Effectively erases stains leaving teeth brighter and smoother
- Gentle on the gingival and enamel
- Smooth texture
- Use with any prophylaxis air polishing unit

Unflavoured

sodium free

sugar free

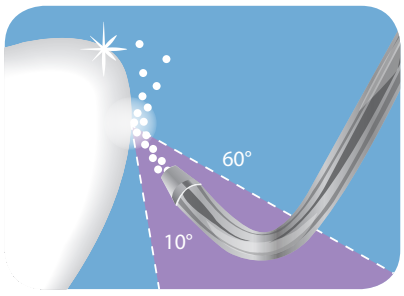

Patented micro-sphere technology minimizes damage to the enamel

Small spherical shaped particles gently remove supragingival stains. The round surfaces offer more contact points than conventional powders and therefore work even more efficiently. At the same time they are gentle on the teeth, as they do not have any sharp edges.

Angle of operation 10° to 60°

Using a more acute angle, Pixie Pearls roll with an infinite number of contact points across the tooth surface and thus release their full effect.

Pixie Pearls is ideal for:

- Patients who do not tolerate the gritty feel of prophy paste
- Light to moderate staining
- Hypertension patients on a reduced sodium diet
- Dental cleaning prior to sealing of fissures
- Dental cleaning prior to whitening
- Prosthetic and orthodontic applications
