DIN 02021137

CHROM-O-RED

Plaque Disclosing Solution

Concentrate

- Helps educate patients on plaque that remains on the teeth after brushing
- Easily visualize problematic plaque areas in need of improved brushing and flossing
- Contains a FD&C (Food, Drugs, and Cosmetics) grade dye that becomes visible when it interacts with plaque
- Highlights areas where improved oral hygiene is needed
- Flavoured with peppermint essential oil

Made in Canada

200 treatments per bottle 60mL

Gluten FREE

EASY TO USE

Add 10 drops of Chrom-O-Red concentrate to 10 mL water. Swish solution between and around teeth for 5 seconds, then spit out. Dental plaque will stain a dramatic red.

No bitter tablet to chew

Ideal for children and other patients with increased risk for plaque buildup due to receding gums, wearing braces, a chronic medical condition or other risk factors.

EDUCATE PATIENTS

INCREASE PATIENT COMPLIANCE

STOP

DID YOU KNOW?

- Dental plaque-disclosing products in liquid, gel or tablet form fall under the F&DA definition of a drug as substances or mixtures of substances manufactured, sold or represented for use in the prevention of disease (which, in this case, results from the accumulation of tartar).
- Depending on its ingredients, a dental plaque-disclosing product can be regulated as a drug under the F&DA either as a pharmaceutical drug subject to the Food and Drug Regulations and requires a Drug Identification Number (DIN), or as a natural health product subject to the Natural Health Products Regulations and require a Natural Product Number (NPN).
- Effective immediately, no new dental plaque-disclosing product will be allowed in the marketplace without a DIN or an NPN.
- As of September 3, 2019, no sale of a dental plaque-disclosing product without a DIN or an NPN will be allowed in Canada.[1]
